Profile

Hybrid IT professional blending **full-stack development expertise** with **strategic project leadership**. Equally comfortable architecting and coding applications or steering multi-team projects from concept to launch.

In 2020 I Founded Stratae, a software development and project management and delivery company.

Employment History

Founder, Stratae, Louvain-la-Neuve

February 2020 — Present

From Feb 2020 to Sep 2024, led the Automation practice at Partena Professional.

- RPA discovery, delivery and operations (Blue Prism)
- Application and script development (C#, VB, and Python)
- Low-code application development (Retool and Power Automate)
- Chatbot application development (Inbenta, Crisp, and Intercom)
- SQL queries for various teams and stakeholders
- Implementation of company-wide product documentation systems

Since 2022, started development of two digital products (still early stage):

- **Paymen**: A modern platform streamlining invoice management from capture to payment processing (frontend with Vue3/Nuxt3/Vuetify3, backend with NestJS, Rest, GraphQL and MongoDB, emails backend with Python, chromium-based browser extension with Svelte)
- **Balas**: A mobile application for private social circles that centralises key social features including messaging, feeds, location sharing, calendar integration, and budget management (frontend with Expo, React Native and Tailwind, backend with Supabase, GraphQL and MongoDB)

For these products, conceptualised the initial ideas, defined functional requirements and early designs, worked with UI/UX designers for mockups, recruited and led a team of remote full-stack developers, while personally serving as lead full-stack developer for Paymen.
